

Lexmark Notifications on Mobile

1. [Download AlertMe app from Play Store](#) (click to view)
2. Make sure to configure the app with permissions for notifications ([click for video](#))
3. Open and create your first alert by clicking the plus sign bottom lower screen.
4. Choose the app to monitor in this case **Outlook**
5. Name the new alert anything you like, Set as recurring Alarm, Sound Enabled, Vibrate, Volume up, Select Sound File from your phone
6. Add Keyword Type of Match Any and enter **“New Lexmark Service”** and click save icon top right
7. Repeat to create additional keyword on same alert **“New Enhanced Lexmark Service”** (free version only allows one alert and allows 2 keywords for that alert so both situations are handled with free version.

Now anytime you receive an email containing the words **“New Lexmark Service”** or **“New Enhanced Lexmark Service”** you will get an alert at the top of your mobile phone playing the sound you choose and vibrating. The popup will have 2 selections, left to Open Outlook to the correct email showing you the Lexmark email details. The popup will remain at the top and the other selection on the right is to Dismiss to close the popup.

Warning: Existing Rules in Outlook created for Lexmark calls will interfere and prevent AlertMe from working and notifying. Please delete any existing rules setup for Lexmark!
